

**AMENDMENTS TO THE CLAIMS:**

This listing of claims will replace all prior versions, and listings, of claims in the application.

**Listing Of Claims:**

1-6. (Cancelled)

7. (Previously Presented) An untethered combination of a pair of eyeglasses and a light source, comprised of:

eyeglasses having a front frame portion and arms extending therefrom; and  
a light source positioned on one of the arms;  
wherein the light source is positioned in a recess of the arm.

8. (Currently Amended) An untethered combination of a pair of eyeglasses and a light source, comprised of:

eyeglasses having a front frame portion and arms extending therefrom; and  
a light source positioned on one of the arms;  
wherein the light source is positioned in a cavity within the arm; and  
wherein the light source is positioned to shine towards the distal end of the arm.

9. (Previously Presented) An untethered combination of a pair of eyeglasses and a light source, comprised of:

eyeglasses having a front frame portion and arms extending therefrom; and  
a light source positioned on one of the arms;  
wherein the light source is positioned to shine towards the distal end of the arm.

10-14. (Cancelled)

15. (Previously Presented) In combination, a pair of eyeglasses and a discrete writing

instrument, comprised of:

eyeglasses having a front frame portion and arms extending therefrom; and

a discrete writing instrument stored on one of the arms;

wherein one of the arms is provided with an opening into a cavity in the arm, the cavity being shaped to receive a writing instrument, wherein the writing instrument is stored; and

wherein a side of the arm is provided with a groove that opens into the cavity, wherein the writing instrument is further comprised of a neck attached at a first neck end to the writing instrument and at a second neck end to a bead, wherein the neck is dimensioned to reside within the groove when the writing instrument is positioned within the groove, and the bead is situated outside of the groove.

16. (Previously Presented) An untethered combination of a pair of eyeglasses and a light source, comprised of:

eyeglasses having a front frame portion and arms extending therefrom; and

a light source positioned on one of the arms;

wherein the light source is positioned to shine towards the proximal end of the arm; and

wherein one of the arms is provided with a container on one of its sides for storing a writing instrument.

17. (Previously Presented) The combination of claim 16 wherein the container is provided with an opening that faces towards a distal end.

18. (Previously Presented) The combination of claim 16 wherein the container is provided with an opening that faces towards the proximal end.

19-23. (Cancelled)

24. (Previously Presented) In combination, a pair of eyeglasses and a discrete screw driver, comprised of:

eyeglasses having a front frame portion and arms extending therefrom; and

a discrete screw driver stored on one of the arms;  
wherein one of the arms is provided with an opening into a cavity in the arm, the cavity being shaped to receive a screwdriver, wherein the screwdriver is stored; and  
wherein a side of the arm is provided with a groove that opens into the cavity, wherein the screwdriver is further comprised of a neck attached at a first neck end to the screwdriver and at a second neck end to a bead, wherein the neck is dimensioned to reside within the groove when the screwdriver is positioned within the groove, and the bead is situated outside of the groove.

25-27. (Cancelled)

28. (Previously Presented) An untethered combination of a pair of eyeglasses and a light source, comprised of:

eyeglasses having a front frame portion and arms extending therefrom; and  
a light source positioned on one of the arms;  
wherein at least one of the arms is reversible.

29. (Cancelled)

30. (Cancelled)

31. (Previously Presented) The combination of claim 7, wherein the recess is positioned at a distal end of the arm.

32. (Previously Presented) The combination of claim 8, wherein the cavity is positioned at a distal end of the arm.

33. (Previously Presented) An untethered combination of a pair of eyeglasses and a light source, comprised of:

eyeglasses having a front frame portion and arms extending therefrom; and

a light source positioned on one of the arms;  
wherein the light source is positioned to shine towards the proximal end of the arm; and  
wherein one of the arms is provided with a container on one of its sides for storing a  
screwdriver.

34. (Previously Presented) The combination of claim 33 wherein the container is provided  
with an opening that faces towards a distal end.

35. (Previously Presented) The combination of claim 33 wherein the container is provided  
with an opening that faces towards the proximal end.
